#### THE USE OF NARCOIN,

The indulgence in narcotics some thing to dall, stupely, and scote the nervous system-is a predominal human weakness. Nature has beet-ap. sacked for parcotics. Tobacco, opm. betel-nut, Indian hemp, even sne kinds of fungi, are employed for a and is either exported or employed for spite of every prohibition and severity.

desired object. When tobacco was fit legitimate medicinal purpose; but t is Before long, too, the owners of mines introduced into Europe, its use w difficult to account for an increasein and plantations discovered that it was off a good burlesque, but the fashionnearly everywhere looked upon wi twenty years of 200 per cent, except in to their interest to connive at the habit, didlike by the authorities. The effor the supposition that the drag is mon as, with its aid, their laborers were able that were made to suppress it amounte largely used as a narcotic than is geneal to perform more work on a given quan- he? to nothing less than persecution, an ally believed. The facility with which tity of food than they could do without their want of success furnishes a seriouthis form of vice can be concealed ren-it. It has thus gradually become the illustration of the uselessness of legisla-lers direct evidence on the subject universal custom to allow from fifteen tive interference with the individual's ifficult to obtain; but such evidence of thirty minutes, three or four times a legitimate freedom of action. It serves can be procured tends to prove that dy, for the purpose of chewing. At also to illustrate in some measure the above supposition is correct. We there there is the first object of the Instrong hold which the taste for narcotics obtains over the mind, especially as to be as possible, for the coca fails to produce the mind, especially as to base of the mildest parcotics of our larger cities that a week the first object of the India is to make himself as comfortable as possible, for the coca fails to produce the mildest parcotics of our larger cities that a week the first object of the India is to make himself as comfortable as possible, for the coca fails to produce the mildest parcotics of our larger cities that a week the first object of the India is to make himself as comfortable as possible, for the coca fails to produce the mildest parcotics of our larger cities that a week the first object of the India is to make himself as comfortable as possible, for the coca fails to produce the mind. tolacco is one of the mildest narcotics of of our larger cities, that a week its ffects unless the chewer be perfectly

in use. Among ourselves, not to mention King James' well-known "Coun-terblast," many petty restrictions were laid on the sale of tobacco during that monarch's reign, and the import duty tings and tenpence a pound. In Eng-tand and elsewhere, remonstrance and penalties were equally unavailing. Topacco made its way steadily into favor, and is believed to be now in use among not less thar, 800,000,000 of the human

Mer, sures of a severe nature have been An tried in China to check the use of topium, and have been quite as unsuessful. However apathetic the Chinese may be in respect to most things, they will not submit to the withdrawal of their favorite narcotic. But in case of so dangerous a poison, some restrictions are as much needed as they are on the sale of spirituous liquors among ourselves; for the effects of habitual excess are not less deplorable than those of habitual drunkenness. Of forty prisoners confined in the house of corection at Singapore, thirty-five were found to use opium; and of these, seventeen, who had been in receipt of ighteen shillings a month as wages, spent twenty-four shillings for opium, the difference being obtained by theft. y From a sanitary point of view, the results are equally sad. The confirmed one opium eater in the east seidom lives place in the quadrille, he beyond the age of forty, and may be large thring towns, where not be distinguished from that of a clapped his hands violently together re beyond the age of lorsy, and may be mothers employed in factories maniac, and the false impressions as to and the lady gave a little cough. ### The Duty of Life.

He who has a low and unworthy idea of his nature will act unworthily; while he who feels how great is the life of a being made in the image of God will any one be told that he cannot choose the right and love the true, and live out the pure, he will feel that if it be so, to try is hopeless work. But we are very sure that it is not so, else how could there dwell within us sorrow and unquiet after doing wrong, if we do not feel that we can do, and ought to do, the right? If such chilling unfaith in themselves and in their kind had been in the heart of the saintly men whose lives have blest the world; who, like salt, have kept the mass from decay how, think you, could they have dared and done? They had faith in man as the fruit of faith in the God who made him; they felt that the life of man is not what it will one day become, and this it was that fired them to earnest effort in the service and salvation of their fellows, and to help on the time when earth shall be the paradise it never has that water lilies may be raised about one's house by the following method:

Who rowing hard against the stream, Saw distant gates of Eden gleam, And did not dream it was a dream.

that lies close at hand is to fulfil the purpose for which we were sent here. The weakest and youngest amongst us is a power for good as well as for evil, and it should be our aim to do our part on the side of ever-increasing human goodness against ever-lessening human badness. There is but one life, if life it may be called, which seems to me to fore than one might think, but their meaning has been set to sweeter music than I can command by Leigh Hunt in the story of Abou Ben Adhem, with which I close this book-

Awoke one night from a deep dream of peace, And saw amid the moonlight in his room, Making it rich and like a hily bloom, An angel writing in a book of gold Exceeding peace had made Ben Adhem bold. And to the vision in the room he said,

What writest thou?" The vision raised its And with a voice made of all sweet accord. "The names of them that love the

And is mine one?" said Abou. "Nay, not Replied the angel. Abou spoke more low, But cheerly still, and said, "I pray thee, Write me as one who loves his fellow-men." The angel wrote and vanished. The next

> LET parents who would avoid an old age of agony in connection with harshness, injustice, and even cruelty to their children, remember never to punish or even threaten a child under the influence of a passionate state of the mind, not readily blot and blur that image. If because the morrow may bring death and no compensation can ever be made. WHENEVER seeds are gathered, they should be labeled and dated. If properly gathered and preserved, beans will retain their vitality for two years; beats, seven; cabbage, four; carrot, two; sweet corn, two; cucumber, ten; onion, one; parsnip, one; peas, two; radish, three; squash, ten; tomato, seven;

turnip, four, Many persons precipitate themselves into the grave by attempting to bravado an ailment-to be up and about in defiance of it. If anything at all is the matter with a man which is really disquieting, he should at least have as much sense as a pig, and go and lie down. Pigs are not such fools as to move about in pain.

To GROW WATER LILIES,-It is said Sink in the ground the half of an old

and calls for a drink of water the first me "what I thought o' that? If there thing, such child is perfectly certain to be meaning in them words, they mean fever comes on, vomiting, and several days' illness.

AVOID MARBLE-TOP TABLES. -According to the Herald of Health marble-top tables are to be avoided. It says: heat and vitality of the body, robbing it of its life. We have heard of one invalid whom the doctor could not cure, until the day he noticed she used a marble stand, and suspected it had something to do with her ill health. So he forbade her to use it. Soon she was well. We know healthy people who feel the twinges of pain in the shoulders by sitting near one. They are handsome, but unhealthy for all that,"

MEAT BISCUITS,-Meat biscuit, so called, which is made in Texas and the liquor of which is evaporated to the consistency of sirup, and then mixed with wheat and flour in such ing-pin, pierced with holes, cut into the shape of sea biscuit, and then baked Taken in connection with the glass and properly dried.
